

CAR DESIGN

Engineering the Structural Logic of Automotive Styling & Aerodynamics

A project-first certification designed to master Surface Modeling, Vehicle Architecture, and Aerodynamic Governance. Design the future of mobility through industrial precision.

THE EDLANX METHODOLOGY

OUR DESIGN PHILOSOPHY

At Edlanx, we don't just "draw cars"; we cultivate an Automotive Architect's mindset. Our program is a deep dive into the structural harmony between aesthetic form and mechanical function. We believe in Total Vehicle Integrity — moving beyond basic sketching to build a robust understanding of Class-A surfacing, ergonomic packaging, and the rigorous aerodynamic governance required for the next generation of electric and autonomous vehicles.

THE FOUR PILLARS OF MASTERY

-  **Aesthetic Logic** Master the structural flow of character lines and silhouettes.
-  **Ergonomic Governance** Learn the logic of human-centric interior packaging.
-  **Surface Architecture** Master the structural precision of Class-A modeling.
-  **Dynamic Strategy** Bring designs to life by mastering the structural link between form and airflow.

Table of Contents

Program Overview

The Edlanx Methodology

Our Development Philosophy

The Edlanx Advantage

01

Vehicle Architecture: The Blueprint of Proportion

1.1 Structural Logic

1.2 Silhouette Governance

02

Sketching & Ideation: The Logic of Form

2.1 Perspective Structural Logic

2.2 Character Line Governance

2.3 Digital Rendering Strategy

2.4 Theme Selection & Variation Logic

03

Surface Engineering: Class-A & NURBS Logic

3.1 Curvature Continuity Structural Logic

3.2 NURBS Governance

3.3 Patch Layout Strategy

3.4 Reverse Engineering & Scan Logic

3.5 Draft Analysis & Manufacturing Logic

3.6 Technical Surfacing Validation

04

Interior Architecture: Ergonomics & HMI Logic

4.1 Occupant Packaging Structural Logic

4.2 HMI & Digital Cockpit Governance

4.3 Interior Volume & Storage Strategy

05

Aerodynamic Governance: CFD & Drag Architecture

5.1 Fluid Dynamic Structural Logic

5.2 Thermal & Underbody Governance

06

Material Infrastructure: Lightweighting & Composites

6.1 Material Selection Structural Logic

6.2 Composite Architecture Governance

6.3 Polymer & Plastic Infrastructure

6.4 Biomaterial & Sustainable Strategy

6.5 Joining & Bonding Structural Logic

6.6 NVH & Acoustic Material Governance

6.7 Additive Manufacturing Strategy

07

Lighting Architecture: LED, Laser, & Signature Logic

7.1 Optical Structural Logic

7.2 Signature Governance

7.3 Adaptive Technology Strategy

08

Powertrain Logic: EV Integration & Battery Packaging

8.1 Skate Architecture Structural Logic

8.2 Thermal Management Governance

8.3 Drive Unit Integration Strategy

09

Toolsets Logic: CATIA, Alias, & VRED Visualization

9.1 Parametric Structural Logic (CATIA)

9.2 Creative Surfacing Governance (Alias)

9.3 Digital Prototyping Strategy (VRED)

10

Financial Logic: Platform Sharing & Manufacturing

10.1 Modular Logic

10.2 Tooling Governance

10.3 Supply Chain Architecture

11

Regulatory Infrastructure: Crash Safety & NCAP Standards

11.1 Passive Safety Structural Logic

11.2 NCAP Governance

11.3 Active Safety Strategy

12

Future Frontiers: Autonomous Living Spaces & AI Styling

12.1 Autonomous Interior Structural Logic

12.2 AI-Driven Generative Styling

WHY CHOOSE EDLANX

01 Industry-Ready Curriculum

We move beyond basic sketching to bridge the gap between creative concept and mechanical feasibility. Our Car Design syllabus is a deep immersion into Vehicle Architecture, Class-A Surfacing, and Aerodynamic Governance — the exact technical pillars used by global OEMs and Design Studios to architect the next generation of mobility.

02 Real-Time Corporate Exposure

Step into a high-fidelity technical environment at our Bangalore Operational Center. At Edlanx, you won't just study "styling"; you will be treated as an Automotive Architect, working in simulated studio environments to master surfacing tools, navigate ergonomic packaging cycles, and manage the structural integrity of digital prototypes.

03 Mentorship & Continuous Assessment

Your growth is guided by senior Automotive Designers and Studio Engineers through structured mentoring and performance evaluations. We focus on developing your ability to manage curvature continuity, troubleshoot topology errors, and translate complex engineering hardpoints into clean, emotionally resonant forms.

04 Skill Mastery & Performance Incentives

Master industry-standard tools like CATIA, Autodesk Alias, and VRED while learning essential professional competencies. We believe in experiential learning and reward breakthroughs in surface quality or aerodynamic efficiency with performance-based stipends, ensuring you remain focused on technical excellence.

05 Global Career Readiness

We enhance your employability by focusing on the Product Development Lifecycle, from initial ideation and clay modeling to digital surfacing and manufacturing validation. Our career guidance includes mock "Design Sprints" and technical interviews tailored for top-tier roles in Automotive Styling, CAS Engineering, and Surface Modeling.

06 Collaborative Engineering Community

Join a supportive culture built on transparency, technical integrity, and disciplined aesthetic critique. You will learn to lead a "theme development" sprint, collaborate across engineering and marketing domains, and grow your network within an elite community of automotive professionals and industrial designers.

07 Verified Professional Certifications

At Edlanx, we don't just issue certificates for attendance; we award them based on verified learning, real-world performance, and practical outcomes. Our credentials are proof of your industry-ready skills and are recognized by institutions and recruiters worldwide.

We provide four distinct levels of certification:

- Internship Completion Certificate: Validates your exposure to professional work culture, verified internship hours, and task-based mentorship.
 - Project Completion Certificate: Proof of your hands-on implementation and problem-solving skills in real-world industry projects.
 - Training Completion Certificate: Issued upon mastering our industry-aligned curriculum and passing skill-based assessments.
 - Certificate of Excellence: A prestigious award reserved for top-performing candidates who demonstrate an advanced understanding.
-

Why This Journey Matters

-  **Portfolio-Ready** Every Class-A surface you engineer, every ergonomic package you solve, and every aerodynamic simulation you optimize at Edlanx serves as a high-fidelity demonstration of your ability to merge artistic vision with industrial reality.
-  **Global Network** Gain exclusive access to the Edlanx alumni community and industry mentors leading design teams at global OEMs, EV startups, and elite automotive engineering firms.
-  **Career Excellence** We move beyond basic sketching to provide the deep "Form-to-Function" logic needed to solve global mobility challenges — from designing the next iconic silhouette to architecting the interior living spaces of the autonomous future.

This course is a living ecosystem. We constantly update our curriculum to reflect the latest shifts in EV platform architecture, the evolution of sustainable biomaterials, and the rapid integration of AI-driven generative design. Your success is our shared mission.

DIRECT MENTORSHIP

Mastering vehicle architecture and navigating the complex constraints of automotive engineering requires absolute technical precision and a refined aesthetic eye. Whether you are perfecting the curvature continuity of a fender, troubleshooting a complex surface intersection in Alias, or optimizing a rear diffuser for maximum downforce, our senior Automotive Designers and Studio Engineers provide the direct, technical feedback needed to ensure your designs are production-ready and world-class.
