

CATIA V5

Engineering the Structural Logic of CATIA & Advanced Product Lifecycle

A project-first certification designed to master Surface Morphing, Assembly Kinematics, and the structural engineering of aerospace-grade systems.

THE EDLANX METHODOLOGY

OUR CATIA PHILOSOPHY

At Edlanx, we don't just teach "3D software"; we cultivate an aerospace-standard mindset. Our program is a deep dive into the logic of high-end product development. We believe in Structural Fluidity — moving beyond basic shapes to build robust, mathematically complex surfaces and mechanical systems that ensure real-time performance and strategic scalability in global manufacturing.

THE FOUR PILLARS OF MASTERY

-  **Part Logic** Master the core architecture of sketch-based features and parametric part design.
-  **Surface Engineering** Learn the structural logic of Generative Shape Design (GSD) for complex aerodynamic forms.
-  **Kinematic Architecture** Understand the engineering of assembly constraints and digital mock-up (DMU) motion logic.
-  **PLM Integration** Bring your designs to life by mastering the structural link between design, engineering analysis, and manufacturing data.

Table of Contents

Program Overview

The Edlanx Methodology

Our Development Philosophy

The Edlanx Advantage

01

The System Blueprint: Infrastructure & Logic

1.1 V5/V6 Environment Logic

1.2 Specification Tree Architecture

02

Sketcher Architecture

2.1 Profile Logic

2.2 Geometric Constraint Engineering

2.3 Sketch Analysis & Stability

2.4 Transformation Logic

03

Part Design Engineering

3.1 Sketch-Based Feature Logic

3.2 Dress-up Feature Architecture

3.3 Boolean Operation Logic

3.4 Transformation & Pattern Logic

3.5 Material & Mass Property Architecture

3.6 Reference Element Governance

04

Generative Shape Design (GSD)

4.1 Wireframe Architecture

4.2 Surface Logic

4.3 Boundary & Join Logic

05

Surface Morphing & Operations

5.1 Curvature Architecture

5.2 Advanced Sweep Logic

06

Assembly Architecture

6.1 Product Structure Logic

6.2 Engineering Constraints

6.3 Contextual Design Architecture

6.4 Interference & Clearance Logic

6.5 Bill of Materials (BOM) Engineering

6.6 Degree of Freedom (DOF) Logic

6.7 Multi-Model Linkage Governance

07

Kinematics & DMU Logic

7.1 Joint Architecture

7.2 Simulation Logic

7.3 Collision & Space Analysis

08

Sheet Metal Architecture

8.1 Generative Parametric Logic

8.2 Wall & Flange Engineering

8.3 Corner & Relief Logic

09

Drafting & Annotation Logic

9.1 View Generation Architecture

9.2 Geometric Dimensioning (GD&T)

9.3 Professional Documentation Governance

10

Generative Structural Analysis

10.1 Meshing Logic

10.2 Boundary Condition Architecture

10.3 Stress & Deformation Logic

11

Manufacturing Logic: Prismatic Machining

11.1 Toolpath Architecture

11.2 NC Code Logic

11.3 Virtual Machining Validation

12

Future Frontiers: Digital Twin Architecture

12.1 PLM Integration Logic

12.2 Virtual Validation Architecture

WHY CHOOSE EDLANX

01 Industry-Ready Curriculum

We move beyond basic 3D modeling to bridge the gap between "drawing" and high-level industrial systems. Our System Design syllabus is a deep immersion into CATIA V5/V6 logic, PLM data management, and the structural constraints required by global aerospace and automotive firms.

02 Real-Time Corporate Exposure

Step into a high-performance professional environment at our Bangalore Operational Center. At Edlanx, you won't just learn software; you will be treated as a Product Design Engineer, working within real organizational frameworks to architect complex assemblies, manage GSD surface logic, and engineer fabrication-ready blueprints.

03 Mentorship & Continuous Assessment

Your growth is guided by senior CATIA Architects and Systems Leads through structured mentoring and rigorous performance evaluations. We focus on developing your ability to solve complex surfacing hurdles and structural kinematic errors with the precision required for live production environments.

04 Skill Mastery & Performance Incentives

Master industry-standard tools like CATIA, DMU Kinematics, and FEA analysis while learning essential professional competencies. We believe in experiential learning and reward innovative structural breakthroughs with performance-based stipends, ensuring you remain driven toward technical mastery.

05 Global Career Readiness

We enhance your employability by focusing on the complete Product Lifecycle, from initial skeleton modeling to final structural analysis. Our career guidance includes technical resume engineering and mock "Design Review" sessions designed to help you secure elite roles in Global Supply Chain and High-End Engineering firms.

06 Collaborative Engineering Community

Join a supportive culture built on transparency, integrity, and disciplined professional ethics. You will learn to lead a design "sprint," collaborate across various engineering domains, and grow your network within an elite community of architects, engineers, and mentors.

07 Verified Professional Certifications

At Edlanx, we don't just issue certificates for attendance; we award them based on verified learning, real-world performance, and practical outcomes. Our credentials are proof of your industry-ready skills and are recognized by institutions and recruiters worldwide.

We provide four distinct levels of certification:

- Internship Completion Certificate: Validates your exposure to professional work culture, verified internship hours, and task-based mentorship.
 - Project Completion Certificate: Proof of your hands-on implementation and problem-solving skills in real-world industry projects.
 - Training Completion Certificate: Issued upon mastering our industry-aligned curriculum and passing skill-based assessments.
 - Certificate of Excellence: A prestigious award reserved for top-performing candidates who demonstrate an advanced understanding.
-

Why This Journey Matters

-  **Portfolio-Ready** Every complex aerodynamic surface and kinematic assembly you architect at Edlanx serves as a live, audit-ready demonstration of your ability to manage the most sophisticated engineering data in the world.
-  **Global Network** Gain exclusive access to the Edlanx alumni community and industry mentors leading system implementations at global automotive leaders, aerospace giants, and Tier-1 industrial suppliers.
-  **Career Excellence** We move beyond simple modeling to provide the technical resume engineering and Product Lifecycle Management (PLM) logic needed to lead digital engineering transformations in the Industry 4.0 era.

This course is a living ecosystem. We constantly update our curriculum to reflect the latest shifts in S/4HANA engineering integration, Generative Shape Design, and Digital Twin architecture. Your success is our shared mission.

DIRECT MENTORSHIP

Navigating an enterprise-grade system stack requires absolute mathematical precision. Whether you are debugging a surface continuity error (G2/G3), optimizing a complex kinematic joint, or architecting a top-down assembly skeleton, our senior CATIA System Architects are available to provide the direct, technical feedback needed to ensure your designs are aerospace-ready.
