

DevOps

Engineering the Structural Logic of Continuous Integration & Automated Deployment

A project-first certification designed to master CI/CD Pipelines, Containerization, and Infrastructure as Code (IaC). Bridge the gap between code and production.

THE EDLANX METHODOLOGY

OUR OPERATIONAL PHILOSOPHY

At Edlanx, we don't just "teach tools"; we cultivate a Systems Architect's mindset. Our program is a deep dive into the logic of automation and the structural reliability of high-scale environments. We believe in Operational Integrity — moving beyond basic scripting to build a robust understanding of Kubernetes orchestration, automated testing, and the rigorous security governance required for modern cloud-native enterprises.

THE FOUR PILLARS OF MASTERY

-  **Pipeline Logic** Master the structural flow from "Commit" to "Production."
-  **Container Governance** Learn the logic of isolated, portable environments.
-  **Infrastructure Architecture** Master the structural lifecycle of cloud-based resources.
-  **Observability Strategy** Bring systems to life by mastering the structural link between real-time metrics and proactive scaling.

04

Containerization Logic: Docker & Image Architecture

4.1 Container Structural Logic

4.2 Image Layer Governance

4.3 Container Networking & Volume Architecture

05

Orchestration Governance: Kubernetes (K8s) Cluster Logic

5.1 K8s Control Plane Structural Logic

5.2 Workload Architecture & Pod Logic

06

Infrastructure Architecture: Terraform & Cloud Provisioning

6.1 Infrastructure as Code (IaC) Structural Logic

6.2 Terraform Provider Governance

6.3 State Management Architecture

6.4 Modular Blueprinting Strategy

6.5 Resource Lifecycle Governance

6.6 Variable & Secret Infrastructure

6.7 Multi-Cloud Resilience Logic

07

Configuration Governance: Ansible & Automated Provisioning

7.1 Push-Based Structural Logic

7.2 Playbook Architecture

7.3 Role-Based Strategy

08

Security Architecture: DevSecOps & Vulnerability Scanning

8.1 Shift-Left Structural Logic

8.2 Scanning Governance

8.3 Compliance-as-Code Strategy

09

Observability Logic: Monitoring with Prometheus & Grafana

9.1 Metrics Structural Logic

9.2 Visualization Governance

9.3 Alerting Architecture

10

Financial Logic: Cloud Economics & FinOps

10.1 Resource Cost Structural Logic

10.2 Tagging Governance

10.3 Scaling Architecture

11

Regulatory Infrastructure: GVP & ITIL Standards

11.1 ITIL Structural Logic

11.2 Audit Blueprinting

11.3 GVP/Compliance Governance

12

Future Frontiers: AIOps & GitOps Architectures

12.1 AIOps Structural Logic

12.2 GitOps Governance & Declarative Autonomy

WHY CHOOSE EDLANX

EDLANX

01 Industry-Ready Curriculum

We move beyond basic scripting to bridge the gap between traditional IT and modern Site Reliability Engineering (SRE). Our DevOps syllabus is a deep immersion into Kubernetes, Terraform, and Jenkins — the exact technical pillars used by tech giants and high-scale startups to architect resilient, automated ecosystems.

02 Real-Time Corporate Exposure

Step into a high-fidelity technical environment at our Bangalore Operational Center. At Edlanx, you won't just study "Cloud"; you will be treated as a Systems Architect, working in simulated production environments to master CI/CD pipelines, navigate container orchestration cycles, and manage the structural integrity of "Infrastructure as Code."

03 Mentorship & Continuous Assessment

Your growth is guided by senior DevOps Architects and Cloud Engineers through structured mentoring and performance evaluations. We focus on developing your ability to design declarative pipelines, troubleshoot cluster failures, and translate complex infrastructure requirements into clean, version-controlled code.

04 Skill Mastery & Performance Incentives

Master industry-standard tools like Docker, Ansible, and Prometheus while learning essential professional competencies. We believe in experiential learning and reward breakthroughs in deployment speed or system uptime with performance-based stipends, ensuring you remain focused on technical excellence

05 Global Career Readiness

We enhance your employability by focusing on the Deployment Lifecycle, from initial code commit and automated testing to production scaling and security auditing. Our career guidance includes mock "Incident Response Sprints" and technical interviews tailored for top-tier roles in Cloud Engineering, DevOps, and Platform Engineering.

06 Collaborative Engineering Community

Join a supportive culture built on transparency, technical integrity, and disciplined "blameless" post-mortems. You will learn to lead a "sprint," collaborate across dev and ops domains, and grow your network within an elite community of automation experts and infrastructure leaders.

07 Verified Professional Certifications

At Edlanx, we don't just issue certificates for attendance; we award them based on verified learning, real-world performance, and practical outcomes. Our credentials are proof of your industry-ready skills and are recognized by institutions and recruiters worldwide.

We provide four distinct levels of certification:

- **Internship Completion Certificate:** Validates your exposure to professional work culture, verified internship hours, and task-based mentorship.
 - **Project Completion Certificate:** Proof of your hands-on implementation and problem-solving skills in real-world industry projects.
 - **Training Completion Certificate:** Issued upon mastering our industry-aligned curriculum and passing skill-based assessments.
 - **Certificate of Excellence:** A prestigious award reserved for top-performing candidates who demonstrate an advanced understanding.
-

Why This Journey Matters

- ▶ **Portfolio-Ready** Every Terraform module you write, every Jenkins pipeline you architect, and every Kubernetes cluster you orchestrate at Edlanx serves as a high-fidelity demonstration of your ability to manage enterprise-scale systems with code-driven precision.
- ▶ **Global Network** Gain exclusive access to the Edlanx alumni community and industry mentors leading infrastructure teams at global tech giants, high-growth SaaS companies, and cloud-first startups.
- ▶ **Career Excellence** We move beyond basic tool tutorials to provide the deep "Design-to-Deploy" logic needed to solve global engineering challenges — from scaling apps for millions of users to architecting secure, self-healing environments that never sleep.

This course is a living ecosystem. We constantly update our curriculum to reflect the latest shifts in GitOps workflows, the evolution of Serverless architectures, and the rapid integration of AI-driven observability. Your success is our shared mission.

DIRECT MENTORSHIP

Managing high-scale infrastructure and navigating the complexities of modern cloud environments requires absolute technical precision and a disciplined operational mindset. Whether you are troubleshooting a failing deployment, optimizing a complex Kubernetes network, or architecting a multi-cloud failover strategy, our senior DevOps Architects and Cloud Engineers provide the direct, technical feedback needed to ensure your systems are resilient, secure, and production-ready.
