

FOOD SCIENCE & TECHNOLOGY

Engineering the Structural Logic of Food Processing, Safety, and Nutritional Innovation

A project-first certification designed to master Food Chemistry, Processing Engineering, and the structural governance of Global Safety Standards. Master the journey from farm-gate to consumer-plate.

THE EDLANX METHODOLOGY

OUR FOOD INNOVATION PHILOSOPHY

At Edlanx, we don't just teach "recipes"; we cultivate a Food Architect's mindset. Our program is a deep dive into the chemical and physical structures of food. We believe in Nutritional Integrity — moving beyond basic cooking to build a robust understanding of thermal processing, shelf-life kinetics, and the bio-chemical stability required for global supply chains.

THE FOUR PILLARS OF MASTERY

-  **Molecular Logic** Master the structural chemistry of macro and micro-nutrients.
-  **Processing Governance** Learn the logic of thermal and non-thermal preservation technologies.
-  **Safety Architecture** Master the structural lifecycle of a product under HACCP and FSSAI/FDA standards.
-  **Sensory Strategy** Bring products to life by mastering the structural link between texture, flavor, and consumer psychology.

Table of Contents

Program Overview

The Edlanx Methodology

Our Development Philosophy

The Edlanx Advantage

01

The Chemical Blueprint: Food Chemistry

1.1 Molecular Logic

1.2 Water Activity Governance

02

Microbiology Architecture: Safety & Spoilage

2.1 Microbial Structural Logic

2.2 Growth Kinetics Governance

2.3 Fermentation Architecture

2.4 Hurdle Technology Strategy

03

Processing Logic: Unit Operations

3.1 Thermal Architecture (Pasteurization & Sterilization)

3.2 Dehydration & Moisture Governance

3.3 Separation & Extraction Logic

3.4 Size Reduction & Homogenization Strategy

3.5 Mixing & Emulsification Governance

3.6 Non-Thermal Processing Frontiers

04

Packaging Architecture: Barrier Properties & Materials

-
- 4.1 Barrier Logic
 - 4.2 Active & Intelligent Governance
 - 4.3 Modified Atmosphere Architecture (MAP)
-

05

Nutritional Logic: Fortification & Bioavailability

-
- 5.1 Bioactive Structural Logic
 - 5.2 Fortification & Enrichment Governance
-

06

Safety Governance: HACCP & Global Standards

-
- 6.1 Hazard Analysis Logic
 - 6.2 Critical Control Point (CCP) Governance
 - 6.3 Critical Limit Architecture
 - 6.4 Monitoring & Validation Logic
 - 6.5 Corrective Action Strategy
 - 6.6 Verification & Audit Governance
 - 6.7 Traceability & Recall Architecture
-

07

Dairy Technology: Liquid & Value-Added Engineering

-
- 7.1 Physicochemical Logic
 - 7.2 Transformation Governance
 - 7.3 Aseptic Architecture
-

08

Bakery & Confectionery Architecture

-
- 8.1 Gluten & Dough Logic
 - 8.2 Sugar Crystallization Governance
 - 8.3 Aeration & Leavening Strategy
-

09

Beverage Technology: Carbonated & Functional Logic

9.1 Carbonation & Dissolution Logic

9.2 Clarification & Filtration Governance

9.3 Functional Formulation Architecture

10

Sensory Logic: Analysis & Consumer Insights

10.1 Psychophysical Logic

10.2 Flavor Chemistry Governance

10.3 Texture Profile Architecture

11

Supply Chain Infrastructure: Cold Chain & Logistics

11.1 Thermal Resilience Logic

11.2 Storage Governance

11.3 Logistics Architecture

12

Future Frontiers: Alternative Proteins & Lab-Grown Food

12.1 Cellular Agriculture Logic

12.2 Plant-Based Protein Governance

WHY CHOOSE EDLANX

01 Industry-Ready Curriculum

We move beyond basic nutrition to bridge the gap between academic chemistry and high-throughput food manufacturing. Our Food Tech syllabus is a deep immersion into Food Chemistry, Unit Operations, and Microbiology — the exact technical pillars used by global FMCG giants and innovative food-tech startups.

02 Real-Time Corporate Exposure

Step into a professional food engineering environment at our Bangalore Operational Center. At Edlanx, you won't just study theory; you will be treated as a Food Technologist, working through real-world challenges to optimize shelf-life, solve emulsion stability, and manage thermal processing kinetics.

03 Mentorship & Continuous Assessment

Your growth is guided by senior Food Scientists and Quality Assurance Leads through structured mentoring and performance evaluations. We focus on developing your ability to perform root-cause analysis, architect robust HACCP plans, and conduct sensory evaluations with the mathematical precision required for modern R&D.

04 Skill Mastery & Performance Incentives

Master industry-standard safety protocols and formulation tools while learning essential professional competencies. We believe in experiential learning and reward innovative breakthroughs in sustainable packaging or nutritional fortification with performance-based stipends, ensuring you remain focused on industrial excellence.

05 Global Career Readiness

We enhance your employability by focusing on the Product Lifecycle, from raw material sourcing and pilot-scale trials to final retail distribution. Our career guidance includes mock "Quality Audits" and technical interviews tailored for top-tier roles in Quality Control, Production Management, and New Product Development (NPD).

06 Collaborative Engineering Community

Join a supportive culture built on transparency, technical integrity, and disciplined ethics. You will learn to lead a production "sprint," collaborate across chemical and microbiological domains, and grow your network within an elite community of food scientists and process engineers.

07 Verified Professional Certifications

At Edlanx, we don't just issue certificates for attendance; we award them based on verified learning, real-world performance, and practical outcomes. Our credentials are proof of your industry-ready skills and are recognized by institutions and recruiters worldwide.

We provide four distinct levels of certification:

- Internship Completion Certificate: Validates your exposure to professional work culture, verified internship hours, and task-based mentorship.
 - Project Completion Certificate: Proof of your hands-on implementation and problem-solving skills in real-world industry projects.
 - Training Completion Certificate: Issued upon mastering our industry-aligned curriculum and passing skill-based assessments.
 - Certificate of Excellence: A prestigious award reserved for top-performing candidates who demonstrate an advanced understanding.
-

Why This Journey Matters

-  **Portfolio-Ready** Every shelf-life study, HACCP plan, and optimized food formulation you architect at Edlanx serves as a high-fidelity demonstration of your readiness to lead in the multi-billion dollar FMCG and Food-Tech industries.
-  **Global Network** Gain exclusive access to the Edlanx alumni community and industry mentors leading quality and R&D teams at global food giants, agricultural exporters, and cutting-edge alternative protein startups.
-  **Career Excellence** We move beyond basic processing to provide the deep chemical logic and regulatory governance needed to solve global challenges — from reducing food waste to engineering the next generation of sustainable, nutrient-dense products.

This course is a living ecosystem. We constantly update our curriculum to reflect the latest shifts in FSSAI/FDA regulations, advanced thermal processing technologies, and the rapid evolution of clean-label ingredients. Your success is our shared mission.

DIRECT MENTORSHIP

Engineering safe and stable food systems requires absolute biological and chemical precision. Whether you are troubleshooting a stability issue in an emulsion, calculating a process lethality value ($\$F_0$), or navigating the complexities of international labeling laws, our senior Food Scientists and Process Engineers provide the direct, technical feedback needed to ensure your products are market-ready.
