

PHARMACOVIGILANCE

Engineering the Structural Logic of Drug Safety & Risk Management

A project-first certification designed to master ICSR Processing, Signal Detection, and the Governance of Global Safety Databases. Protect patient lives through data integrity.

THE EDLANX METHODOLOGY

OUR VIGILANCE PHILOSOPHY

At Edlanx, we don't just "report side effects"; we cultivate a Safety Architect's mindset. Our program is a deep dive into the causality logic and structural reporting requirements of the pharmaceutical industry. We believe in Signal Integrity — moving beyond basic data entry to build a robust understanding of MedDRA coding, Narrative Writing, and the complex regulatory governance required for global compliance.

THE FOUR PILLARS OF MASTERY

-  **Causality Logic** Master the structural assessment of the link between drug and event.
-  **Reporting Governance** Learn the logic of Expedited vs. Periodic safety reporting.
-  **Database Architecture** Master the structural lifecycle of Argus and ArisG safety systems.
-  **Analytical Strategy** Bring safety to life by mastering the structural link between post-market data and proactive risk mitigation.

Table of Contents

Program Overview

The Edlanx Methodology

Our Development Philosophy

The Edlanx Advantage

01

The Safety Blueprint: Intro to PV & Regulations

1.1 Regulatory Logic

1.2 Lifecycle Governance

02

ICSR Logic: Individual Case Safety Reports

2.1 Triage Structural Logic

2.2 MedDRA Hierarchical Governance

2.3 Narrative Architecture & Clinical Logic

2.4 Duplicate Search & Data Reconciliation Strategy

03

Assessment Logic: Causality & Seriousness

3.1 Causality Structural Logic

3.2 Expectedness & Labeling Governance

3.3 Seriousness Architecture

3.4 Medical Coding Validation Logic

3.5 Narrative Analysis Strategy

3.6 Outcome & Action Governance

04

Database Logic: Safety System Management (Argus/ArisG)

- 4.1 Workflow Structural Logic
- 4.2 E2B(R3) Data Governance
- 4.3 Database Configuration Architecture

05

Signal Architecture: Detection & Evaluation

- 5.1 Qualitative Signal Logic
- 5.2 Quantitative Governance (Data Mining)

06

Safety Governance: Risk Management Plans (RMP) & REMS

- 6.1 RMP Structural Logic
- 6.2 Risk Minimization Governance
- 6.3 REMS Architecture (US FDA)
- 6.4 Benefit-Risk Strategy
- 6.5 Medication Error Infrastructure
- 6.6 Post-Authorization Safety Studies (PASS)
- 6.7 Crisis Governance & Communication

07

Periodic Logic: PSUR, PBRER, & PADER Reporting

- 7.1 Aggregate Data Structural Logic
- 7.2 Line Listing Governance
- 7.3 Submission Strategy

08

Quality Architecture: Audits, Inspections, & SOPs

- 8.1 Compliance Structural Logic
- 8.2 Audit & Inspection Governance
- 8.3 Root Cause Analysis (RCA) Strategy

09

Toolsets Logic: E2B(R3) Transmission & XML Data

9.1 Electronic Reporting Structural Logic

9.2 XML Architecture & Validation

9.3 Interoperability Strategy

10

Financial Logic: The Economics of Safety & Outsourcing

10.1 Unit Cost Structural Logic

10.2 PV Outsourcing Governance (BPO/KPO)

10.3 Regulatory Fine Infrastructure

11

Regulatory Infrastructure: GVP Modules & ICH Guidelines

11.1 Global Guidelines Structural Logic

11.2 GVP Module Governance

11.3 Health Authority Blueprinting

12

Future Frontiers: AI & Automation in Case Processing

12.1 Intelligent Automation Structural Logic

12.2 Social Media & Real-World Evidence Governance

WHY CHOOSE EDLANX

01 Industry-Ready Curriculum

We move beyond basic medical terminology to bridge the gap between clinical healthcare and the industrial rigors of drug safety. Our Pharmacovigilance syllabus is a deep immersion into ICSR Processing, Signal Detection, and Risk Management Plans — the exact technical pillars used by global Pharmacovigilance centers and CROs to protect public health.

02 Real-Time Corporate Exposure

Step into a high-fidelity technical environment at our Bangalore Operational Center. At Edlanx, you won't just study "side effects"; you will be treated as a Safety Architect, working within simulated database environments to master MedDRA coding, navigate narrative writing cycles, and manage the structural integrity of global safety data.

03 Mentorship & Continuous Assessment

Your growth is guided by senior PV Physicians and Safety Scientists through structured mentoring and performance evaluations. We focus on developing your ability to assess causality using Naranjo scales, troubleshoot coding inconsistencies, and translate complex clinical case reports into concise, regulatory-ready narratives.

04 Skill Mastery & Performance Incentives

Master industry-standard safety databases (like Argus/AriseG) and E2B transmission logic while learning essential professional competencies. We believe in experiential learning and reward breakthroughs in data accuracy or signal identification with performance-based stipends, ensuring you remain focused on technical excellence.

05 **Global Career Readiness**

We enhance your employability by focusing on the Safety Lifecycle, from initial case intake and triage to aggregate reporting and health authority inspections. Our career guidance includes mock "Safety Sprints" and technical interviews tailored for top-tier roles in Drug Safety, Regulatory Affairs, and Clinical Research.

06 **Collaborative Engineering Community**

Join a supportive culture built on transparency, technical integrity, and disciplined ethics. You will learn to lead a "vigilance-sprint," collaborate across medical and data-entry domains, and grow your network within an elite community of safety professionals and regulatory experts.

07 **Verified Professional Certifications**

At Edlanx, we don't just issue certificates for attendance; we award them based on verified learning, real-world performance, and practical outcomes. Our credentials are proof of your industry-ready skills and are recognized by institutions and recruiters worldwide.

We provide four distinct levels of certification:

- **Internship Completion Certificate:** Validates your exposure to professional work culture, verified internship hours, and task-based mentorship.
 - **Project Completion Certificate:** Proof of your hands-on implementation and problem-solving skills in real-world industry projects.
 - **Training Completion Certificate:** Issued upon mastering our industry-aligned curriculum and passing skill-based assessments.
 - **Certificate of Excellence:** A prestigious award reserved for top-performing candidates who demonstrate an advanced understanding.
-

Why This Journey Matters

- ▶ **Portfolio-Ready** Every ICSR you process, every MedDRA code you assign, and every safety narrative you architect at Edlanx serves as a high-fidelity demonstration of your ability to safeguard public health through precise data governance.
- ▶ **Global Network** Gain exclusive access to the Edlanx alumni community and industry mentors leading safety teams at global pharmaceutical giants, CROs, and regulatory consulting firms.
- ▶ **Career Excellence** We move beyond basic data entry to provide the deep causality logic and risk-mitigation strategy needed to ensure that life-saving medications remain safe for millions of patients worldwide.

This course is a living ecosystem. We constantly update our curriculum to reflect the latest shifts in GVP Modules, the transition to E2B(R3) standards, and the rapid integration of AI-driven automation in case processing. Your success is our shared mission.

DIRECT MENTORSHIP

Managing drug safety data and navigating global regulatory requirements requires absolute clinical precision and ethical integrity. Whether you are performing a complex causality assessment on a serious adverse event, troubleshooting an E2B transmission failure, or interpreting a new safety signal, our senior PV Physicians and Safety Scientists provide the direct, technical feedback needed to ensure your reports are compliant and scientifically sound.
