

SELENIUM TESTING WITH JAVA

Engineering the Logic of Automated Validation & System Reliability

A project-first certification designed to master Selenium and Java logic to build resilient, self-validating software ecosystems.

THE EDLANX METHODOLOGY

OUR VALIDATION PHILOSOPHY

At Edlanx, we don't just teach "testing"; we cultivate a quality engineering mindset. Our program is a deep dive into the intersection of Java logic and web automation. We believe in Continuous Reliability — moving beyond manual clicks to build automated frameworks that detect friction before it reaches the user.

THE FOUR PILLARS OF MASTERY

-  **Scripting Logic** Master the core foundations of Java to write clean, reusable, and high-performance automation scripts.
-  **Element Architecture** Learn to identify and interact with web elements using advanced locator strategies with mathematical precision.
-  **Framework Engineering** Understand the relationship between Page Object Models (POM) and Data-Driven logic to build scalable test suites.
-  **Seamless Integration** Bring your tests to life by integrating them into CI/CD pipelines to ensure every code commit is automatically validated.

Table of Contents

Program Overview

The Edlanx Methodology

Our Development Philosophy

The Edlanx Advantage

01

The Quality Blueprint: Java Foundations

1.1 The Scripting DNA

1.2 Decision & Loop Logic

02

Automation Architecture: Selenium Core

2.1 The WebDriver Engine & JSON Protocol

2.2 Browser Command Logic

2.3 Synchronization & Wait Strategy

2.4 Navigation & History Architecture

03

The Developer Edge: Integration & Portfolio

3.1 Project Lifecycle Management (Maven)

3.2 Version Control for Quality Assurance

3.3 Continuous Integration Logic

3.4 Architectural Documentation

3.5 Technical Report Analysis

3.6 Portfolio Architecture

04

Structural Blueprints: Locator Logic

4.1 Precision Targeting

4.2 Dynamic DOM Navigation

4.3 Element Attributes

05

Dynamic Interaction Engineering

5.1 Advanced User Gestures

5.2 Handling Virtual Friction

06

Scalable Components: Page Object Model (POM)

6.1 The Blueprint for Scale

6.2 Page Factory Initialization Strategy

6.3 Object Repository Engineering

6.4 Component-Based Architecture

6.5 Custom Method Encapsulation

6.6 CacheLookup Optimization

6.7 Framework Maintenance Logic

07

Data-Driven Logic & Automation

7.1 High-Volume Validation

7.2 Parameterization Logic

7.3 Database Connectivity

08

Analytical Validation: TestNG & Reporting

8.1 The Execution Engine

8.2 Assertions & Truth Tables

8.3 Professional Reporting

09

Backend Logic: Grid & Parallel Execution

9.1 Selenium Grid Architecture

9.2 Parallel Processing Logic

9.3 Cross-Browser Infrastructure

10

Career Launch: The Global Architect

10.1 Framework From Scratch

10.2 Technical Interview Simulation

10.3 The Edlanx Huddle

11

Professional Engineering & Ethics

11.1 The Virtual Guard

11.2 Industry Standards

11.3 Collaborative Integrity

12

Future Frontiers: AI & Self-Healing Scripts

12.1 The Autonomous Tester

12.2 Visual Testing Logic

WHY CHOOSE EDLANX

01 Industry-Ready Curriculum

We move beyond basic "record and playback" tools to bridge the gap between academic theory and the high-demand automation market. Our Quality Architecture syllabus is a deep immersion into Java-based automation, focusing on framework scalability and system reliability.

02 Real-Time Corporate Exposure

Step into a high-performance professional environment at our Bangalore Operational Center. At Edlanx, you won't just study; you will be treated as an Automation Engineer, working within real organizational workflows on live, high-concurrency web projects.

03 Mentorship & Continuous Assessment

Your growth is guided by senior Quality Architects through structured mentoring and regular performance evaluations. We focus on developing your ability to solve complex synchronization and locator logic problems with the confidence required by global tech firms.

04 Skill Mastery & Performance Incentives

Master industry-standard tools like Selenium, TestNG, Maven, and Jenkins while learning essential professional competencies. We believe in experiential learning and reward technical breakthroughs with performance-based stipends, ensuring you stay motivated to achieve mastery.

05 **Global Career Readiness**

We enhance your employability by focusing on the complete Automation Life Cycle, from initial test planning to final CI/CD integration. Our career guidance includes technical resume engineering and mock QA-coding interviews designed to help you secure elite engineering roles.

06 **Collaborative Engineering Community**

Join a supportive culture built on teamwork, integrity, and disciplined professional ethics. You will learn to lead a "sprint," collaborate across various digital domains, and grow your network within an elite community of developers and mentors.

07 **Verified Professional Certifications**

At Edlanx, we don't just issue certificates for attendance; we award them based on verified learning, real-world performance, and practical outcomes. Our credentials are proof of your industry-ready skills and are recognized by institutions and recruiters worldwide.

We provide four distinct levels of certification:

- **Internship Completion Certificate:** Validates your exposure to professional work culture, verified internship hours, and task-based mentorship.
 - **Project Completion Certificate:** Proof of your hands-on implementation and problem-solving skills in real-world industry projects.
 - **Training Completion Certificate:** Issued upon mastering our industry-aligned curriculum and passing skill-based assessments.
 - **Certificate of Excellence:** A prestigious award reserved for top-performing candidates who demonstrate an advanced understanding.
-

Why This Journey Matters

- **Portfolio-Ready** Every self-healing framework, parallel execution suite, and CI/CD pipeline you engineer becomes a high-performance showcase on your GitHub, proving you can protect the digital integrity of global enterprises.
- **Global Network** Gain exclusive access to the Edlanx alumni community and industry mentors currently architecting automated validation systems at top-tier global firms and disruptive tech startups.
- **Career Excellence** We move beyond basic scripting to provide technical resume engineering, mock QA-coding interviews, and the leadership skills needed to dominate the high-stakes world of software reliability.

Quality is not an act, it is a habit. At Edlanx, we ensure you have the architectural logic and professional certification to lead the next era of automated software engineering.

DIRECT MENTORSHIP

Your engineering growth shouldn't happen in a vacuum. Whether you are stuck on a complex dynamic XPath or need feedback on your Page Object Model strategy, our senior Quality Architects are just a message away. We are here to ensure your transition into the world of professional Quality Architecture is seamless and high-impact.
